9. Mother: I'm looking for a babysitter, which is really stressing me out. But I thought if anyone could help me, it would be you!

Friend: I'd be happy to share my experiences! First of all, only contact babysitters that are recommended by other parents. Then, invite the candidates home to meet the children before making a commitment.

Mother: Well, I've already invited a young girl for an interview, but how can I be sure I'm choosing the right person?

Friend: ----

A) What is important is that you should agree on the fee and hours with the babysitter before she babysits.

B) Even though you feel sure about this babysitter, it's also important that your children are happy with her.

C) If you and the children like her, and you think she seems reliable, you can ask her to come for a trial sit.

D) It is your responsibility as a parent to satisfy yourself that the babysitter will act responsibly and safeguard the well-being of your children.

E) She should only babysit when she feels well and she should arrive early so that the children are settled before you leave.

**Soruda verilen durumda söylenmiş olabilecek sözü bulunuz.**

10. It is 1 a.m. and you have an important exam tomorrow but your upstairs neighbor is having a party with lots of people. Although you warned them an hour ago, they are still very loud. You go upstairs again and say angrily: ----

A) I'm really upset that you didn't invite me to your party.

B) If this party doesn't end in ten minutes, I'm calling the cops.

C) I wouldn't do this to you if you had something important to do the next day.

D) I really miss my old neighbors. They knew how to throw a party.

E) This party is lame. All these people, but no one to talk to.

**11-13. soruları aşağıdaki parçaya göre cevaplayınız.**

It is easy to become fatalistic about environmental problems since the destruction of the natural world continues at high speed. Many people actively avoid environmental news because it makes them feel hopeless, but there is no reason to despair. A recent analysis suggests that while the loss of biodiversity is undoubtedly serious, it is far from unstoppable. If we make the right choices now, we can stop the decrease by 2100. What would it take? A major step to take is to occupy less space by producing more food from smaller patches of land and using current technologies such as genetic modification. In today's world, such solutions may seem very simple and idealistic, but the other option, fatalism, is simply a guarantee of failure. In fact, we still have the chance to save the majority of biodiversity without making huge sacrifices. People who care about the natural world have every reason to keep on fighting.

11. It can be understood from the passage that a lot of people ----.

- A) have recognized that they must more actively combat environmental destruction
- B) feel pessimistic about their ability to prevent the loss of biodiversity
- C) believe that news on environmental destruction does not reflect the truth
- D) think that they have done everything they can to save the environment

12. According to the passage, by 2100, ----.

- A) the loss of biodiversity will remain at a moderate level if people do not take necessary precautions
- B) people will need to use far more space to produce large amounts of food
- C) genetic modification will not be effective alone unless people stop their destructive activities
- D) those who struggle to save the natural world will have to fight more diligently
- E) people will be able to stop the decline in biodiversity if they take appropriate actions

13. What is the primary purpose of the author?

- A) To persuade readers that it is not too late to save the environment
- B) To inform readers that they need to make radical changes in their lifestyles to stop the loss of biodiversity
- C) To warn readers that they should use current technologies more effectively to protect the environment
- D) To show that fatalism can trigger people to save the natural world
- E) To stress that solutions to the loss of biodiversity do not seem feasible
- E) have begun to pay more attention to the news focusing on environmental problems

**Soruda boş bırakılan yere, parçada anlam bütünlüğünü sağlamak için getirilebilecek cümleyi bulunuz.**

14. How do humans and the environment affect each other? There are three key concepts to the interaction between humans and the environment: humans adapt to the environment; humans modify the environment; and humans depend on the environment. ---- For example, clearing a forest for farming produces food, but also destroys trees. Burning coal provides energy, but also pollutes the air.

- A) Most of the changes people make on the environment are intentional, such as building wide tunnels through mountains.
- B) Humans have always had a huge impact on the environment, by changing or trying to blend in with their surroundings.
- C) The environment provides food and shelter to humans and various sources of energy to maintain their lives.
- D) Some particular actions that humans carry out have pluses and minuses for them and the environment.
- E) The environment can shape laws, customs, lifestyles, and economic activities of humans to a great extent.
